WORK EXPERIENCE

Full Stack Developer
ACU PAY thailand

September 2025 - Present

- **Lead Coordinate API Integration:** Main coordinator for API integrations with key enterprise clients (such as SF Cinema, Major Cineplex, PTG Energy) and SMBs—managing end-to-end processes from delivering API specifications, gathering requirements with executives, and coordinating internal teams, to post go-live support and direct client consultations.
- **Workflow Optimization (CFR : ITMX-Portal):** Developed a fund-flow data submission management program for the Central Fraud Registry (CFR) system to track and manage suspicious account cash flows, eliminating redundant steps and boosting daily case resolution efficiency by 3–4x while building an automated data entry system with historical tracking and a real-time analytics dashboard.
- **Product Owner & Project Lead (New Company Website):** Led a 5-member development team in building the company's new website using an Agile framework while hands-on developing the frontend—achieving a 2.5x–3x performance increase compared to the legacy WordPress site, managing Cloud/Database architecture, and implementing SEO-ready capabilities.
- **Operations Management:** Guided a team tracking financial trails and suspending suspicious accounts, overseeing workforce allocation and workflow structuring, authoring operational manuals, and onboarding new staff to elevate team performance.

Research and Development (Intern)

June 2023 - August 2023

NTPLC - National telecom public company limited

- Designed and developed a traffic video management and analytics system powered by YOLOv8 AI models, including a web application for video uploading and database integration, leveraging the (AMD) Vitis Video Analytics SDK for real-time vehicle and motorcycle detection, alongside an automated reporting tool exporting analysis data in CSV format recording key traffic variables like vehicle type, color, and timestamp.
- Designed and implemented an intelligent digital signage system utilizing Anthias for comprehensive organizational public relations.

EDUCATION

Bachelor of Computer and Robotics Engineering
Bangkok University

July 2020 - June 2024
